SUMMARY

I am a Software Developer who builds modern and user-friendly web applications using React.js. I work on designing interfaces, managing application state, and integrating APIs. I collaborate with backend services to deliver complete and functional web solutions from concept to deployment.

WORK EXPERIENCE

Frontend Developer (React.js)

Oct 2022 – 2024 (2 Years)

- Developed and maintained modern, responsive web applications using React.js.
- Designed user-friendly interfaces with Tailwind CSS and Material UI.
- Managed complex application state using Redux Toolkit, RTK Query.
- Integrated frontend applications with backend REST APIs.

Backend Developer (NestJS)

July 2024 – Present (1 Year)

- Developed backend services and RESTful APIs using NestJS.
- Implemented authentication and authorization using JWT.
- Designed and handled API endpoints for frontend integration.
- Worked with databases for CRUD operations and data validation.
- Collaborated closely with frontend applications to ensure smooth data flow.

Frontend Developer Intern

- Learned frontend fundamentals including HTML, CSS, JavaScript, and React.js.
- Assisted in building UI components and fixing frontend bugs.
- Practiced API integration and basic state management.
- Gained experience working on real-world web application features.

EDUCATION

Matric & Intermediate

- Umer School System
- Gov Science college Wahdat Road LHR.
- 2018 - 2022

Bachelor of Computer Science

- University of South Asia
- Major in Software Engineering
- 2022- 2026

KEY SKILLS

- HTML
- Javascript
- Redux toolkit
- DB Postgres
- Nest js
- Tailwind Css
- React js
- Node js
- Express
- Problem-Solving

LANGUAGE

- English
- Urdu
- Punjabi
